12 YEAR PROJECT 2022-2034

Context of the proposal

What will the world be like in the next 12 years?

There are several possible scenarios. May the chaos of the capitalist system deepen, may a nuclear “accident” occur, may a return to the Middle Ages marked by obscurantism, etc., or may there be a non-violent rebellion of the people towards a Universal Human Nation.

The capitalist system has already collapsed and yet people, in general, continue to believe that this is **“the only possible”**, that there is no other system that can replace it, because this is the **“belief system”** that works, given that the system constantly tries to manipulate people’s subjectivity. They continue to do so and in an increasingly crude way, installing money as a central value (the supreme god) source of happiness, success and all existential meaning. This central value implies a tendency to concentrate in a few hands, deifying those who decide the future of humanity.

The people of the world are also exposed, almost without realizing it, to **“nuclear accidents”** due to wars driven by the capitalist system, with the consequent risk of the disappearance of human life on the planet.

Finally, people will be able to rebel against the situation of oppression they suffer as a result of the internal implosion of each closed system. This rebellion could be violent, with massive loss of human life, or it could be **“Non-Violent”** in relation to a **Universal Human Nation (UHN)**.

Faced with this **“crazy wave of violence”**, which will probably continue to increase, we would be in the 1st scenario “system chaos”, which is why the current ICT will coordinate a 12-year project, decided by all full members.

We know that we cannot compete with the DIFFUSION system, but the axis must be there: **because no one can choose what they don’t know**. And for us it should always be a diffusion linked to the growth of the organism.

We know that it is necessary to rebuild the social base and to this end we propose a non-violent and humanist political, social and human revolution. We know that to produce this revolution it is necessary to unite all the humanists in the world (not only the Siloists and the different organizations of Universalist Humanism but to give space to other organizations and people who harbor in their hearts a spirit of placing the human being as a central value) .

We know that human beings, faced with the advancement of individualism and the feeling of a closed future with which they are daily bombarded by all means of communication, are losing FAITH in themselves and in their possibilities of action to direct this long-awaited change that is part of your “DNA” from birth, leaving your own future, that of others and that of new generations in the hands of “others”.

Therefore, the project must contemplate and implement actions that reverse this situation that has plunged human beings into an immobility that, if continued, will lead to a setback that endangers their very existence.

We believe that the function of the Humanist Party is effectively revolutionary and to implement in the organization of society, what **Silo** called “**the modification of the psychosocial context**”. Capitalism will end when people stop believing in it. We are defenders of the demonstration effect because it not only argues, but “shows” in practice that things can be different.

In this **first stage of disintegration**, no “other belief system” will be able to take hold until the old one has finished dissolving. Therefore, the publicity we do is important. If we manage to maintain our proposal in the middle, many people will begin to disbelieve in the system and will approach us, producing significant growth.

In a **second phase**, that is, the one in which the system collapsed, we must place ourselves at the service of this broad humanist social movement that will need to restructure society based on other values. It is at this moment that we can move towards the Universal Human Nation.

General objectives:

1. May the International Humanist Party with its political ideology based on Active Non-Violence be a reference for a new global social construction, through the struggle for a social and human political revolution that overcomes the chaos and collapse of the capitalist system.
2. Strongly promote the proposal to build the Universal Human Nation.
3. Form within 4 years an International Federation of HPs with a complete organic presence on the five continents.
4. Form a massive global Humanist International that allows the convergence of parties, social organizations and related people who adhere to the Humanist Document.
5. Study and publicize Silo's book “Letters to my friends about the personal and social crisis”, as a strategic and tactical reference for political action, for the party's position in society and, especially, to deepen the Humanist Document. This book must first be promoted as a reference to humanist activism and then advance on a global level, both in theory and in practice.
6. Promote, promote and form humanist activism for the tropism of taking political power at all levels and administrative functions to produce the transformations proposed in Letters 7 and 10 (fronts of action, demonstration effect, process and revolutionary leadership, etc. .). We need to provide the necessary tools so that all those who, embracing politics as a revolutionary element, firmly believe in the possibility of being elected by popular vote as councilors, mayors, full members and presidents. Capitalism harms us internally because it is not possible to transform our society. With

internal faith we will have to break this strong belief that is nestled in the hearts of many of us.

7. Promote and stimulate numerical growth, in the places where we are, where we have already been and open new ones.

Specific objectives:

- Support and encourage the configuration of NCTs in training and promotion teams.
- Geographically coordinate support for nearby teams set up or training, as well as expanding IHP globally.
- Implement political training workshops and seminars with HP's Foundational and Ideological Documents.
- Resolutely promote militancy on a social basis. In other words, in neighborhoods, communes and municipalities as a necessary first step towards assembling a human-based structure (base teams), close to the needs of the populations.
- Promote joint and simultaneous actions in local, national and international campaigns, in accordance with the resolutions of the Full Members of the International Humanist Party and the process of the Humanist International in all regions and countries.
- Implement personal and political training workshops/seminars/retreats with the Personal Training Manual for members of the Humanist Movement, "Letters to My Friends" by Silo, founding documents and contributions made by humanist activists and collectives since the founding of IHP

WHY (past causes)

- Because we need to tune in and synchronize in joint actions to gain strength as HP worldwide. Supporting each other, reinforcing the feeling that we are part of a larger project that includes and improves us as individuals.
- Because it's time to give signals in a different direction than the current one. We have a legacy and we are responsible for its development.
- Because it is necessary to stimulate the strength of our global action in public health.
- Because it is necessary to encourage teamwork and joint action to achieve a Universal Human Nation.
- Because we still need to bring to the world what gave rise to us.
- Because the construction of a growing humanist popular power is pending, the only real option against the power of the banks.
- Because it is necessary to advance the thesis that Universalist Humanism proposes as the only revolutionary option in the face of the destructive chaos of international financial capital.
- Because the alternatives are very clear: destructive chaos or revolution, anti-humanism or humanism.

- Because the times present us with the worst dystopias and the best utopias. We live 30 minutes from the beginning of the end of humanity, however, the almost possibility of prolonging life without time limits is increasingly recognized.

- Because there are signs all over the world that a new sensitivity is being born, especially among younger people, for a more supportive, sustainable world, without the conditions of the world that is leaving.

- Because it is necessary to live the utopia of the beginning of the Universal Human Nation and not live the failure of capitalist and violent anti-humanism.

WHY (future aspirations)

Under the premise of Silo: ***it must be at the heart of what you believe, the key to what you do!!!***

- Experience that the coherence of non-violent joint action can free people from oppressive conditioning in their development.

- Grow a continuous social force including associations and related parties, converging towards a Humanist International that forces a change in the anti-humanist direction of the capitalist regime, growing in influence and giving increasingly clear signals of our proposals.

- Grow full member participation and the formation of new NCTs and BTs around the world. Opening new points where we are not, boosting where we already are and reconnecting in others where we have already been.

- Move towards building the Universal Human Nation.

- So that through the exercise of political power, people's living conditions can change drastically, thus making our contribution to the construction of the Universal Human Nation.

- Place the human being as a central value and concern in a new system that changes current living conditions and allows people to progress towards Peace with their past, Strength with their present and Joy with their future.

WHEN

A 12-year project scheduled to begin at the end of 2022 and end in mid-2035.

WHERE

In the places where we already are and opening other geographic locations across the planet.

WHO

HP activists and new members who embrace the cause of building a Universal Human Nation.

WHAT WE HAVE

We count on the fall of the belief based on the myth of money.

We have the support of all the good people who have seen their aspirations for a better world frustrated by an immoral system based on money.

We have the support of all the good people who today feel that, between humanist aspirations and the realities of today's world, a wall has been erected, a wall that will be torn down with the unity of all humanists in the world.

And we basically rely on our internal faith, which we will try to transmit to new people. Thank you to those who preceded us and who contributed so much in embracing this beautiful utopia.

Organizationally we have:

- 1 ICT

- 391 full members

- 14 countries we are in

- base teams around the world

- 11 NCTs in training (Belgium, Bolivia, Brazil, Ivory Coast, Costa Rica, Ecuador, Iceland, Italy, Mexico, Paraguay and Uruguay)

- 3 NCTs (Argentina, Chile, Spain)

- Meetings with NCTs, NCTs on training and promotion teams

- Meetings of full members

- Websites

- <https://www.internationalhumanistparty.org>

- <https://www.humanistfuture.org> (PHI campaigns)

- <https://www.partidohumanista.es>

- <https://www.partidohumanistadeargentina.org>

- <https://www.partidohumanista.cl>

- Social networks of PHI and different countries

- Facebook, <https://www.facebook.com/eci.phi/>

- Twitter, @PHI_ECI

- Instagram, @phumanistainternacional

- Action fronts and

- Local supporters.

HOW (Implementation)

Giving participation to full members and affiliates committed to the construction of the project. Creation of specific workspaces: geographic expansion, training and education, networks, etc. necessary to consolidate a strong image that gives us a global esprit de corps.

Characterize HP as an anti-capitalist and revolutionary party, which proposes non-violent struggle as a methodology of action and real democracy as a new form of exercising power.

Organize growth to have an organic presence on five continents.

Reopening the Humanist International.

Promote the study and discussion of Silo's book "Letters to my friends". Going deeper into the themes: fronts of action, demonstration effect, process and revolutionary leadership.

Promote all types of action fronts, with the framework expressed in "Letters to my Friends".

Promote the formation of trade union and student organizations along the lines of what was stated in the seventh Letter to my Friends.

Carry out joint World Actions, to create that synchronization between PHs that reinforces belonging to a larger group.

Promotion of Forums and Meetings on different scales: local, provincial, national, regional and global.

Implementation of personal and political training workshops/seminars/retreats with the Personal Training Manual for members of the Humanist Movement, "Letters to my Friends" by Silo, founding documents and contributions made by humanist activists and collectives since the founding of IHP.

Enable different areas of personal work, based on the Manual for Members of the Humanist Movement.

Form ad hoc teams to prepare and organize the different proposed areas.

Promote synchronization in specific campaigns or actions, with the different Universalist Humanism Organizations.

Connecting with social groups for global campaigns, IH and Forums at all levels.

Establish links in joint actions with local, national and global environmental organizations.

Maintain a presence on social media, in neighborhood stores and, above all, run for elections because then the system opens a window for us with the media.

Producing demonstration effects of Humanist Neighborhood Councils that will showcase a new social fabric.

Develop forms of actions that promote civil disobedience and non-cooperation with the current violent and bankrupt system.

Continuing the ICT Meetings with the NCTs and the full members meetings.

Continuing with positions and conversations.

B) Elements to take into account.

CONDITION OF ORIGIN

We see the broader social context in which the project originates represented in the "World Situation Analysis" prepared by ICT in August 2022 (can be seen in full at <https://www.internationalhumanistparty.org/es/doc/analysis-of-the-world-situation-eci-phi-August-2022>)

Here we transcribe his summary:

SYNTHESIS

We live in dystopian times, this is clearly indicated by what we analyze about the development of the cultural model and its anti-values, the fraudulent and violent functioning of the economy, the monstrosity of the military-industrial complex, the suffering generated by the environmental catastrophe, the manipulation of subjectivity through mass media and information, the permanent violation of human rights in almost all latitudes, the concentration of power and decision-making in a few hands, the enormous inequalities in access to health, education and the quality of life, the evident energy crisis, the distortion of the direction and application of science, which puts us on the brink of a devastating catastrophe of nuclear war.

At the same time, we saw that science and technology, largely used for oppression and destruction, have enormous potential to overcome everything that generates pain, having achieved civilizational development for decades, having objective conditions to live without hunger, without malnutrition, without misery and without poverty.

The current global social system is in terminal crisis, and it is this disturbed functioning that threatens the existence of the human race itself and life on the planet. At a global level, there is an increasingly explicit dispute that pits US leadership against the leadership of China and its ally, Russia. The hegemony of the USA as a superpower is strongly questioned due to the economic, commercial and technological development that is being implemented by China. During the current war between NATO and Russia, for now only on Ukrainian territory, the US leadership has stated that its real enemy is China and not Russia. In this game between a few, we are increasingly violated, with at this moment no organized force that can firmly oppose us and, above all, build a powerful alternative.

For months now, the elites of the most relevant interstate and private organizations on the international scene and in the context we have already mentioned, began to announce upcoming famines, crises due to lack of supply and rising energy prices, recessions and loss of resources. millions of jobs, in countries and areas that are not used to this, such as Central and Nordic Europe. It is announced that the European winter will be dramatic for a large part of the population of that continent, which heralds protests and revolts that are difficult to predict in terms of scope and consequences. Let's not even talk about what could happen in regions of the planet already devastated by severe malnutrition, poverty and misery as we saw throughout our analysis.

How to understand a historical moment where the possibility of the extermination of the human species coexists with the possibility of extending life over time in an unlimited way?

It is undoubtedly an exceptional moment. How can we understand a historical moment in which almost 8 billion human beings live on the planet and fundamental decision-making is concentrated among just a few hundred people?

We conclude this analysis of the world situation assuming that for now it is the powerful minorities that impose themselves almost at will, without measuring the growing destruction generated by their decisions within a general process that they will not be able to prevent from getting out of hand. We know that it is popular power, the only power that can truly oppose the power of money and the private financial system that also has its armed wing under its control: the military-industrial complex.

The global and particular situation will continue to grow in its degree of conflict, in its contradictions the system will mechanically generate huge protests, revolts, revolutionary processes, which as we know does not mean that they will finally take a true revolutionary direction. The next few months are seen as very critical both because of the crises that the system will generate, their destructive consequences and the possible positive, transformative and even revolutionary responses that we, the oppressed, can give.

ANYTHING ELSE

We have concluded our analysis, we will see what we find in the next analysis in 2023. We want to add as an appendix some reflections on the role of our party, our organizations, our humanism and humanism in general.

At the end of the work, we mentioned the decisive importance of popular power to overcome the power of leaders and build true alternatives that influence a change of direction and/or that remain standing after the widespread disaster of the current system.

For us, the popular power that interests us is that of the organized people, projecting itself in a clearly humanist direction. Humanist popular power must place the main issues of the moment on a social basis, with resolution and depth. We need to converge with other truly related humanisms to propose revolutionizing the relationship between capital and labor and putting an end to the private financial system. It is urgent to place the issue of disarmament in the face of the arms race at the center of political issues; the question of real democracy, given the decline of formal democracy. We need to promote the decentralization of the State apparatus and establish among the primary issues the issue of social ecology in the face of ecological disaster, anti-discrimination in the face of discrimination; the theme of liberation from oppression; the question of the meaning of life, in the face of the resignation, complicity and absurdity that anti-humanism promotes. We urgently need to install the issue of active non-violence, as a response to a system that sustains itself through different forms of violence.

In addition to deeply questioning what is established, we need to believe that change is possible, that this change requires a certain organization, that this organization requires a certain direction and that this certain direction must be humanistic.

The vast majority around the world could agree today with the ideas expressed in the Humanist Document (04-05-1993), but they do not know them.

In today's world, communist-humanists have been operating for a long time; the socialist-humanists; the ecologist-humanists, the Christian-humanists. There are pacifist currents, insurgencies among indigenous peoples, there are those who fight for the defense and achievement of human rights, there are those who work for non-discrimination.

There are atheists and people with faith in human beings and their transcendence, who have in common with us a passion for social justice, an ideal of human fraternity based on the convergence of diversity, a desire to overcome prejudices. They are like us in trying to build a coherent personality, in which personal life is not separated from the fight for a new world.

There are also millions of people who denounce and carry out humanitarian actions who, despite in many cases their naivety, are undoubtedly capable of deepening and expanding their thinking and action, coming together in a great planetary humanist movement. To achieve this, our HP must do their part and make their contributions. We need to strongly grow our PH and project it as an international reference, we need to converge in different areas and actions with other organizations, action fronts and siloist expressions. As has been said many times, the union of all humanists in the world is necessary and urgent in the broadest sense of the word.

As we said at the beginning of this work, with great lucidity and understanding of the historical and social process, Silo left us especially in his book “Letters to my friends about the personal and social crisis”, a universal political project, a new utopia, as an option to the current inhumane system.

In this new period of our organization, we invite the NCTs formed and in training and the base teams, activists and adherents in general, to exchange, publicize, discuss and make contributions to an analysis that has remained a very summarized work. The compositional complexity of current civilization makes the diversity of facets of the reality of the current world unfathomable, even so, we understand that this work is a necessary and useful contribution to the reality of the present and the possibilities of transformation in the future.

We conclude in the validity of what was futurized by Silo regarding the development of the human process and the stage that we continue to go through, which does not require gradual changes that hide the survival of the current system of oppression, but rather that this historical moment requires a series of “effects of demonstration” energetic enough to produce a general inflection of the process, to produce a non-violent humanist revolution that allows us to overcome the chaos and destruction and enter into true and warm human hist.

August 2022

We can summarize the situation we started from as follows:

- We are 391 full members in 14 countries.
- 3 NCTs and 11 in training.
- A growing number of affiliates and supporters of Universalist Humanism proposals. *see more details in the “What we have” section.

The design condition of the 12-year project went through a process that emerged at the Meeting with full members in December 2022. ICT was in charge of preparing a proposal on the same. The sending continued to all full members, so that at a later meeting they could exchange information on the subject. After this instance, an ad hoc team was created that reworked the project until it reached its final version, which will be submitted for consideration by all full members, through an affirmative or negative vote on the 1st, 2nd and 3rd of December 2023.

STAGE AND EVENTS.

COMPLEMENTATION STAGE 2022-2034

STAGES	CHARACTERISTICS	EVENTS
2022 2026 D I F E R E N T I A T I O N	<p>In each country, growth projects are developed according to their situation, moments in the process, etc. aiming at the legalization and participation in HP elections at its different levels.</p> <p>We suggest adapting the project itself to 12 years at different levels. The revolutionary and non-violent leadership itself, overcoming the capitalist system, will strengthen itself in the face of the environment, with the aim of advancing the construction of the UHN.</p> <p>There is a tendency to develop everything that prepares local conditions for a strong growth of the social base, to take the leap to a larger scale in the complementation stage with Base Teams, Action Fronts, Union and Student Fronts.</p>	<p>Reopening of Internacional 2024</p> <p>World Forum 2024</p> <p>Internal elections 2024 and 2026</p> <p>Annual Census and Report</p> <p>Organic presence on 5 continents</p> <p>World March for Universal Human Nation 2030.</p> <p>Internal elections 2026 and 2028</p> <p>Internal elections 2028 and 2030</p> <p>Annual Census and Report</p>

EVALUATIONS (including INDICATORS)

Throughout the process, continuous assessments will be carried out to correct and/or modify what is proposed depending on our situation and the environment.

Assessments of the overall progress of the project will be carried out every six months.

Deadlines will be defined for each objective or task to be developed.

After each action we take we must take into account:

- Places we participate in, activities carried out, etc.
- In-person form (how many people participated)
- Virtual form (were social networks used? What has been the response to the messages? How many people participated?)
- Growth of base teams
- Presence of HP in new locations
- Tuning and synchronization in global actions

11/20/23 Ad hoc team of the “12 Year Project”
